THE JOHN BISSELL 1628 ASSOCIATION

The John Bissell 1628 Association, which published this volume, was established in 1933. This Volume One covers the First Five Generations 1628 to approximately 1800. Work on the Sixth Generation is now in progress.

The Association takes its name from Captain John Bissell (1591-1677) who came to New England from England in 1628. This common ancestor of all members of the Association was one of the early settlers of Windsor, Connecticut. He brought blooded cattle to the colony from England, fought the Indians, held several public offices and for many years operated the first ferry across the Connecticut River.

The Association has more than 350 members who live in 38 of the United States and four Canadian Provinces. Meetings are held at Windsor, Connecticut on the next to the last Saturday in September of the even numbered years.

Persons desiring further information concerning the Association are invited to communicate with one of its officers.

Preface to Part I: First five generations

These pages contain a list of the known descendants of Captain John Bissell to the sixth generation, with known dates and places of birth, marriage and death and known names and dates and places of birth and death of their respective spouses. This has been compiled from original Church and Town records and from gravestones and family Bibles.

For convenience in tracing a line, each individual has been assigned a hyphenated number. The first portion of this number indicates his or her generation, while the second portion indicates his or her number in that generation. The descent from John is indicated parenthetically after each name: if a Bissell, by first name only). After each father and mother, the children are listed chronologically. An asterisk before a name indicates that that individual is known to have had no children. The term "Windsor, Ct." is used to include "East Windsor" and "South Windsor" as well as "Windsor".

I wish to express my gratitude to the various members of our family who have sent me evidence of the dates and places of birth, marriage and death of many of our forebears. Especially would I like to thank Mr. Haskell Venard, of Atlanta, Georgia, himself a descendant of Captain John Bissell through several lines, who supplied a great deal of information concerning the second and third generations particularly, correcting errors made by Henry R. Stiles in his "History and Genealogy of Ancient Windsor". These errors were corrected through painstaking perusal of original Church and Town records and of gravestones.

Hopefully, additional information of these descendants will be found as I continue my genealogical work. Yearly, I will forward such information to the John Bissell 1628 Association.

These first five generations list the descendants of Captain John Bissell to approximately the year 1800. I shall continue my work and hope in the future to submit the next six generations, generation by generation, until we have the descendants of Captain John Bissell up to the present date. Should I die before so doing, my records and work sheets in this connection will be presented to the John Bissell 1628 Association by my wife, Mary, without whose help and understanding I could never have accomplished what little I have.

Let us always take an interest in the exploits of our forebears and strive to follow their good example to the glory of God and our Country.
